Metallurgia — Index to Volume 53

JANUARY - DECEMBER 1986

		C		p	
A to 7 of materials testing	76	Gas, Effective use of, on high temperature furnaces	544	Plant investment for superalloy production	509
A to Z of materials testing	507	GEM '85 celebrates success for gas	60	Plasma nitriding — major expansion for heat-treatment group	340
Advanced manufacturing technology	516 515	Growth of the contract neat-treatment industry	00	Polymer quenchants show benefits in metal heat-	
Aerospace exhibition reflects metallurgical advances All set fair for Chicago show	471 135			Potential for CAD/CAM in the forging industry	425 517
Aluminium refinery makes major energy savings	416			Power for efficiency and productivity	48 132
Austin Rover choose induction for today's hammer and tomorrow's technology	164			Producing superior forgings with low temperature Programmer-controller development — what next?	339
-		H			
		Heat sources in thermal processing Horizontal continuous casting technology in the	277		
		eighties	192	Q	
В		Howmet completes superalloy plant expansion	514	Quality in the forge	422
BFIA Convention addresses new technologies	529			Quicker, cheaper heat-treatment with electric stress-	
control	419			relieving furnace	166
future outlook	7				
British Heat Treatments' .D process now available in Britain	167	1			
		IMI Precision diecasting opens new factory	12 365	H	
		12th International forging congress — technology	451	Rapid solidification processing and materials -	200
		International journalists focus on Metals Engineering '86	88	a technical overview	372
C		Investment casting	36	furnaces	52 150
Carriage of nuclear fuel flasks	291 104	FURNACES'86	92	Recent developments in the field of vacuum heat-	
Cheaper route for brass rod production	407			Research and development extends use and	268
Commitment to quality demonstrated in precision small part manufacture	421			effectiveness of tin	358
small part manufacture Companies profit from gas	324				
Composite materials — a bright future in aerospace applications	366	I			
Contract heat-treatment — an expanding service Cronite radiant tubes — development and application	10 374	Joint developments in automotive metallurgy	383	S	
		Joint venture heralds major to in atmosphere- vacuum furnaces	16	Selection and heat-treatment of tool steels	157
				Small foundry meets modern standards with furnace	345
				Specialist forging developments brought to fruition	462
D				Spotlight on thermal processing	346 410
Demonstration projects highlight advances in energy		I.		Spray deposition Steel requirements of the closed-die forging industry	282
saving DFRA EITB seminars raise CAD/CAM awareness	185	Low expansion superalloys for gas turbine engineering	479		
DFHA/EITB seminars raise CAD/CAM awareness	224	Low thermal mass electric furnaces give speed, quality and flexibility	364		
		quality and nearbinity	501	_	
				T TILL OF THE PARTY OF THE PART	000
E				The heat is on for FURNACES '86	253 176
Egginton Bros etaal a lead with electricity	165	**		Toolmakers profit from vacuum technology	461 317
Electricity puts PEP into industry Electroforming as a production process	63	M	450	a wanty yours or program in ordered radules.	011
Electroterming as a production process Electroheat shows benefits in the metal industry	534 537	Market developments in the UK	453		
Energy management — more than fuel cost reduction Expansion continues at award-winning Davy Forge	362 221	Forgings'86	211		
Expertise in vacuum technology demonstrated	272	manufacture	499	U	
		Conference Programme gather momentum	4	UK furnaces fulfil Italian contracts	101
		METLAB 118, 238, 428,	581	Use of residual gas analysers on industrial vacuum furnaces	273
F					
Forging Association merger produces streamlined organisation	227	N			
Forging technology centre spurs developments for		New high-performance casting alloy developed	199	V	100
industry Forging Today	528	Nickel and mankind	519	Vacuum carburising developments	169 140
Forging to the fore at Metals Engineering '86	493	Nitrotec process exploited in new surface engineering company	504	Vertical vacuum furnaces — their uses and design options	332
metal technology	216				
From strength and lightness to stronger and lighter FURNACES '86	414				
FURNACES '86 — Exhibitors in the news FURNACES '86 — A sell-out sycress	128				
FIRNACES '86 in focus	303	0		w	
	441 559	Opportunities for laser treatment in the automotive		Warm forging in practice	143
Furnaces, Buyers' Guide Furnaces for the aerospace industry	478	industry	183	West Midlands	14

AUTHOR INDEX

Bayliss, R.H.											282	Garaway, M.								132	Rogers, Dr. S.E.						461
Birch, B.J.											157	Hart, A.C								534	Schade, J.P.						519
Bird, R.I.											176	Herring, D.H.								169	Segerberg, S						425
Bodin, J											425	Hibberd, D.F.	02 1							52	Short, N						478
Cartwright, B.											422	Holtom, D.P.								183	Symonds, C.H						479
Cholet, O											499	Humphreys, H.	R.O.						***	517	Thomas, A						461
											140	King, J	***							199	Unsworth, W						199
											66	Lane, J.								414	Voss-Spilker, P.						410
England, J.											339	Listmann, P.								269							199
Farmer, D.											322	Mallardi, J.L.								507	Wood, J						339
Ferguson, J											291	Read, G.P								169							
Fricker N.											544	Reichelt, W.								410
